| | <i>Fork Lift Safety</i> |

S2 Learning also provides courses that cover many standard OSHA topics. Additional courses are constantly under development.

The Higher Education Story

For over a decade S2 Learning has partnered with some of North America's most prestigious colleges and universities to keep campus communities safe. S2 provides a library of safety and risk management courses for students, faculty and staff. For students, we offer courses such as, new student orientation, lab safety, and driver safety. For faculty and staff, we also offer an emergency vehicle operator course, security solutions course, and various OSHA courses. S2 Learning's clients include Princeton University, Massachusetts Institute of Technology and Georgetown University.

S2 Learning's turnkey safety training solu-

tions provide effective online training that is hosted on our servers. We work directly with university safety and security professionals to create training that can be accessed 24/7 and tracked via the internet. The courses can be delivered "off-the-shelf," or they can be easily customized to meet the needs of a particular institution. S2 Learning offers a simple, economical and cost effective way to make colleges and universities a safer place for everyone. ♦

About S2 Learning

S2 Learning is a training and performance services company headquartered in Belpre, Ohio. S2's consulting services include learning assessment, instructional design, curriculum development, safety and performance improvement. S2's production services include the development of instructor led, computer/internet based and blended curricula. Curricula created by S2 are "turnkey" and include all instructional, multimedia, and assessment elements. Finally, S2

supports a number of technologies that allow it to host and disseminate content for clients in customized environments that track and manage learning.

S2's professionals have completed projects encompassing a wide range of topics including: manufacturing, safety, compliance, retirement, insurance, financial, technical, sales and marketing. These projects have been undertaken for companies as diverse as the topics themselves, including companies operating in

the following markets: financial, insurance, food manufacturing, equipment manufacturing, pharmaceutical, higher education, retail and human resources. S2's main objective is to partner with our clients to provide creative learning services that demonstrate an appropriate balance between cost and effectiveness.

S2 Learning maintains productive, long-lasting partnerships with companies around the world. ♦
